

Take - Home Exercise

Let's try doing a survey on trachoma prevention of your family. If there's anything not clear for you, ask your mother, father, brothers and sisters. It would be best for you to do this survey at home, just after dinner with the presence of all family members. When you finish, read the results to the whole family (Total from 80-100: Very good, 60-70: Good, 50-60: Average, Below 50: Bad, should try harder). Two months later do it again to see whether the results change.

	Trachoma prevention activities	Scores	
		Yes	No
1	Mother attended trachoma meeting	10	0
2	After meeting Mother told all family members about the contents	10	0
3	Father heard messages on trachoma prevention (through commune loudspeakers, mother, local promoters...)	10	0
4	All my family members have private face towel and every one uses his own towel	10	0
5	I always wash my face towel with soap and dry it in the sun	10	0
6	My family always keeps house, kitchen, animal styles and toilet clean	10	0
7	My family always take part in village-cleaning movement	10	0
8	I know how to sing the song" To make the whole family happier"	10	0
9	I help Mum and Dad wash face for my little brothers and sisters	10	0
10	I teach my young brothers and sisters and the kids of neighbors how to prevent trachoma	10	0
	<i>Total</i>		
	<i>Total 2 months later</i>		

Take - Home Exercise

(5 - 10 minutes)

Your teachers have taught you about trachoma and how to prevent this blinding disease. Your father, mother, grand father, grandmother, sisters and brothers.... have already heard about this. Let's see which of them are intelligent and have a good memory by putting A,B,C into a correct sentence the quickest. Remember to count how many minutes it takes each of them to do a sentence.

	A	B	C
1	Trachoma	wash face towel with soap	be affected with trachoma
2	Everybody should	is very	to prevent trachoma
3	You should wash your face	houses, village	of trachoma prevention
4	Actively participate in	may	having trachoma
